Professional Summary

Software Engineering graduate with hands-on experience building data-driven applications, ETL pipelines, analytics platforms, Power BI dashboards, automation tools, and full-stack solutions using Python, SQL, PostgreSQL, Power BI, TypeScript, Pandas, and NumPy. Experienced in data extraction, transformation, validation, visualization, API integration, and relational database design. Developed projects spanning data engineering, business intelligence, analytics, workflow automation, and software development. Seeking opportunities in Data Engineering, Data Analytics, and Business Intelligence.

Technical Skills

Data Engineering

ETL Pipelines, Data Modeling, Data Transformation, Data Validation, Data Processing, Data Quality Monitoring, SQL Optimization

Data Analysis

Pandas, NumPy, Exploratory Data Analysis (EDA), Data Visualization, Jupyter Notebook, Matplotlib

Databases

PostgreSQL, Supabase, Relational Database Design, Database Normalization

Programming

Python, SQL, TypeScript, JavaScript, C++, PHP

Business Intelligence

Power BI, DAX, Excel, Dashboard Development, KPI Reporting, Business Analytics

Software Engineering

REST APIs, API Integration, Git, GitHub, OOP, Agile Methodologies, SDLC, CI/CD, System Design

Projects

JobPulse Pakistan – Data Engineering & Labor Market Analytics Platform 🔗

Python, PostgreSQL, SQL, Power BI

- Developed Python ETL pipelines processing 1,000+ job records across multiple sources for automated ingestion, transformation, and loading of job market datasets from multiple sources.
- Implemented skill extraction, data validation, quality monitoring, and PostgreSQL/SQLite warehousing workflows to support analytics.
- Built SQL analytics views and reporting layers to identify hiring trends, in-demand technologies, and workforce insights.
- Integrated Power BI dashboards and reporting solutions to visualize labor market analytics and support data-driven decision making.

Power BI Analytics Dashboard Suite 🔗

Power BI, DAX, ETL, Data Modeling

- Built Power BI dashboards containing 15+ KPIs and interactive reporting views using Power BI, ETL workflows, dimensional data modeling, and DAX calculations.
- Performed data cleaning, transformation, modeling, and visualization to convert raw datasets into actionable business insights.
- Developed KPI reporting solutions and optimized DAX measures to improve dashboard performance and analytical accuracy.

Balochistan Complaint Analytics Platform | Hadoop Big Data Project 🔗

Hadoop HDFS, MapReduce, YARN, Ubuntu Linux, Flask, Python, Pandas, HTML, CSS, JavaScript

- Developed a Big Data analytics platform using Hadoop HDFS, MapReduce, Ubuntu Linux, and Flask.
- Configured and managed Hadoop ecosystem components including HDFS and YARN in a virtualized Linux environment.
- Built interactive dashboards by integrating Hadoop-processed data with a Flask web application.

DevPilot – VS Code Extension 🔗 , Final Year Project

TypeScript, REST APIs, VS Code API

- Developed a developer productivity extension using TypeScript and Visual Studio Code APIs to automate repetitive development workflows.
- Designed modular architecture and integrated external REST APIs to extend functionality and improve developer efficiency.
- Applied software engineering best practices including debugging, testing, version control, and CI/CD workflows.

Education

Bachelor of Science in Software Engineering, Lahore Garrison University

NSCT Score: 91st Percentile

2026 | Lahore, Pakistan
